EXPERIENCE

Self Employed

May 2022 – Present

Frontend Software Engineer

Remote, Lagos, Nigeria

- Built Heyme, a time capsule where users can send a message to their future self. In 24 hours of launching, over 21 users recorded and sent a video to their future self, and the Heyme website received 380+ website visits. Tech stack used to build Heyme: Typescript, TailwindCSS, React, Cloudinary Video Hosting, Zeptomail Email Provider, SQL, MySQL database, Github and Vercel Hosting.
- Contributed to open source Joplin note taking desktop application (ReactJS & Electron)
- Organized and moderated Twitter spaces to encourage and share knowledge in tech with new developers. Latest Twitter Space organized had a total of 509 listeners.
- Wrote 3+ articles educating developers on how to contribute to open source, performance optimisation of frontend applications, and user experience decisions as a frontend engineer.

Tensei

November 2021 – May 2022

Open Source Product Manager

Lagos, Nigeria

- Managed a team of 3 engineers to build and ship an open source headless CMS that grew to 600+ Github Stars on Github.
- Collaborate with the lead engineer to plan, strategize and organize sprints and milestones for engineering teams.
- Use Linear to organize and assign tasks for engineering teams
- Asynchronous communication on Slack, and synchronous communication on Google Meet.
- Conducted product and user research on competitors like Contentful, Hygraph, and planned and prioritized around features for MVP launch of headless CMS.
